Rxe1/TH

The command unit PIF 230/6A (lux and time adjustable) supplies 5 volts towards max two very small sensor(s) PD-360. The receiver Rxe1/TH reads the info from the command unit and can switch the lights on/off. Local override can be done by pushing the transmitter-switches Txe 2 EURO (no battery inside). All the power (230 volts) is distributed by the distribution box. In case of faulty unit(s), replacement is very easy (plug & play).
