

Technical information on the gesis system

Dear customer,

Recently an increasing number of statements have been made by competitor third parties that their products are compatible to the Wieland gesis connector system (GST18 or ST18).

We explicitly state that no compatibility agreement between Wieland and third parties exists. Furthermore, there are no third parties belonging to our technical modification service.

Our connector systems and processes are subject to continuous improvement and development. That is the reason why we can grant a full warranty only when the original Wieland gesis components are used. If Wieland connectors are combined with those of other manufacturers, a trouble-free electrical and mechanical function of the system cannot be guaranteed.

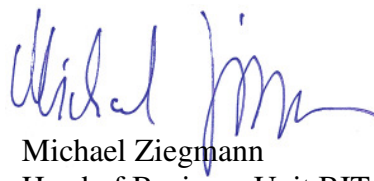

In order to guarantee the safety of our products, we will prosecute each statement by third parties claiming compatibility.

Using a third-party product with the gesis connector system voids the Wieland warranty, and the user assumes all risk.

With kind regards,

John Paulsen
